

ASSET MANAGER

£45k - £55k DOE

Are you wanting to make a difference at one of Europe's busiest transport hubs then please read on. We are a business underpinned by our engineering infrastructure and you can now be part of our team to develop our broad and complex range of engineering assets.

Job summary and skills/qualifications required

Job summary:

We are looking for someone who can lead the development, implementation and operation of effective asset management system across the business. We are seeking a manager with knowledge of good practice to engage and developing people's understanding and competence in asset management.

You'll be required to have a proven engineering background with good working knowledge of maintenance, operation, design and construction of multi-disciplinary assets. Working experience in using a 'mature' asset management system is essential.

Skills and Qualifications:

- Bachelor's degree in Engineering
- Membership and engagement with the Institute of Asset Management or equivalent
- A demonstrable understanding of CDM Regulations and Health & Safety Legislation
- Demonstrable knowledge of reliability centre maintenance
- Full diving licence and use of own transport

Please send a CV and covering letter outlining your salary expectations to the email address below.
